Sparking new thinking  
in disease management

## Expert webinar series

Delivered to you weekly on key topics  
around asthma, chronic lung disease  
and infectious disease.

As the current environment in which we find ourselves continues, we look for opportunities to continue to support Australian Healthcare Professionals by offering valuable educational content related to GSK medicines/vaccines and the relevant disease states.

Delivered by local and international specialist physicians, the Ignite webinar series aims to provide Healthcare Professionals with insights into optimising management of common chronic and vaccine-preventable diseases, drawing on the latest research and clinical guidelines. The series will run regularly at 7:00pm AEST, covering a range of therapy areas, including asthma, COPD, invasive meningococcal disease and other vaccine preventable diseases. Please click the 'Find out more and register' links to register for the webinars below.

### **OUR NEXT WEBINAR**

#### **Every Vaccination Counts: The value of immunisation during past and present pandemics**

Community concerns about health have amplified during the COVID-19 pandemic and have also highlighted the benefits of vaccination as a tool to help prevent serious disease. The upcoming webinar will explore the lessons learnt from previous pandemics and the priorities for immunisation today. The discussion will include current Australian Immunisation Handbook recommendations and the guiding principles for maintaining immunisation services to help protect vulnerable populations from vaccine preventable diseases. The session will address frequently asked questions and include an interactive Q&A.

#### **Every vaccination counts: The value of immunisation during past and present pandemics**

Thursday 16<sup>th</sup> July, 7–8pm AEST

**Associate Professor Michael Nissen**, Director of Scientific Affairs and Public Health for GSK Vaccines
