

SAS PROGRESS DASHBOARD

Do I need to turn on the Progress Dashboard?

No, the game play data is automatically saved each time a Cadet plays and completes an activity. The progress dashboard will report this data if the player is logged in with their unique agent username. The progress dashboard is not available for those using the “open_access” username.

Who can see a Cadet’s progress?

The Progress Dashboard can only be securely accessed by the adult who activated the product key and agreed to the Privacy Collection Statement for the Cadet playing SAS Digital HQ. Additionally, a PDF report can be downloaded to share the Cadet’s progress with another SAS Mentor (e.g. for parents sharing results with their Cadet's clinician or teacher).

How do I download a full progress report?

Reports are downloaded for each level of the game individually. You can download your latest level reports (one level or all) as often as you would like to.

My Cadet has been playing activities but no progress is showing in the dashboard. What does this mean?

Progress data will only show once a Cadet has completed an activity. If the Cadet exits an activity before completing it then that data won’t be saved. Please also ensure that the Cadet is logged in under their unique agent username and not using the “open_access” username.

My child’s SAS Mentor (clinician; teacher) activated the SAS Product Key on my behalf. How can I access my child’s progress?

Please speak to your SAS Mentor regarding accessing this information. A PDF report can be downloaded to share the Cadet’s progress with you.

Can a Cadet see their own Progress Dashboard?

The Progress Dashboard is designed for adult SAS Mentors and is accessed through the adult’s account with the Social Skills Training Institute. Cadets are given simple progress updates and motivational prompts as they progress through the game. If it is deemed appropriate to share the Progress Dashboard with a Cadet, it is highly recommended that this is reviewed with the support of an adult SAS mentor.
